

THE NEW 3.7L ROADSTER

The most powerful production Morgan Classic to date.

The Roadster remains the flagship Morgan 'classic' sports car. From November 2011 the enticing louvered bonnet of this iconic car will encompass a new experience all together; the Ford 3.7 litre V6 engine.

The new Roadster will feature a 6 speed transmission and an estimated power output of over 260bhp in a car with a total weight less than 950kg.

There will be an increase in price. The price for the new 3.7 litre Roadster V6 is now set at £2800 more than the previous 3.0 litre model.

The regrettable increase has been forced upon us by engine supplier Ford. As such basic prices are now:

RHD Sport	£ 39,050.00
RHD Bespoke 2 str	£ 36,133.33
RHD Bespoke 4 str	£ 39,466.67
LHD Sport	£ 41,800.00
LHD Bespoke 2str	£ 37,835.00
LHD Bespoke 4 str	£ 40,715.00

At this time the prices for optional extras remain unchanged. The dealer margin also remains at 13.5% (10.5% UK supplied LHD cars)

The anticipated power output will fall between 260 and 280bhp.

Estimated CO2 emissions will mean the car will remain in the current tax band.

The Roadster will now also feature a 6speed gearbox and a new dash / dial aesthetic.

Full figures and accurate specification details will be confirmed within the next few weeks and sent to you with the copies of the CFCs.

Production will commence 6 weeks from now.
